

# ANNIE ROSE WEBB

---

I'm a high-energy developer with experience in front and backend software development, accessibility requirements and testing, and teaching HTML, CSS, JavaScript and Git to a wide range of students at different levels of experience.

I have a degree in Cognitive Science from the University of Toronto.

## SUITE SKILLS

- *HTML*
  - *SCSS / SASS*
  - *JAVASCRIPT*
  - *INVISION*
  - *GIT*
  - *REACT*
  - *VUE.JS*
  - *DOCKER*
  - *PYTHON*
  - *WORDPRESS*
  - *ACCESSIBILITY*
  - *BOOTSTRAP*
- 

## RECENT EXPERIENCE

**2019** I'm currently the Web Development Director at Hopeworks, a Camden, NJ nonprofit helping young developers build brighter futures. I take client projects from ideation to launch and manage a team of incredible junior devs. I'm also a working developer on a disaster management website that will help people track emergencies.

---

**2018** From May to September 2018 I was a software development intern at Tembo, making their Vue.js and React frontend maintainably accessible and creating and testing components in Python and Jinja. My freelance projects included webmastering two online retail boutiques and working with a budding startup to create an online South African stock photography marketplace.

---

**2017** I spent February 2017 - March 2018 at Coded by Kids, a Philly nonprofit working to provide resources for underserved students. I taught HTML, CSS, JavaScript and Git; spearheaded their student-led dev shop and managed ops for 17 high school programs.

---

**2016** Before 2017, I designed and prototyped a communication app in InVision for users with dementia.
